

Butcher's Sew Shop COVID-19 Hygiene & Safety Plan Updated October 5, 2021

We want to assure you that Butcher's Sew Shop remains committed to your family's safety. We are following all guidelines set forth by the Center for Disease Control (CDC) and the Pennsylvania Department of Health for child care programs. This is an evolving document as we continue to follow the activities of these agencies so that we are up to date on any new rulings or guidance that may be issued.

As outlined below, we will be implementing enhanced cleaning and sanitizing standards as well as new protective measures, and a comprehensive plan has been put in place in the event of confirmed unintentional exposure.

Pre-Class Screening Process:

Upon registration, you will digitally sign our COVID-19 Health Agreement. This agreement states your understanding that if your unvaccinated child is showing any symptoms related to COVID-19 or has interacted with anyone with COVID-19 symptoms, they must be sent home and kept at home until certain criteria are met.

Symptoms of COVID-19 are

LIST A:

- Cough
- Shortness of breath
- Difficult Breathing
- New loss of sense of smell
- New loss of sense of taste
- Fever

OR a combination of 2 or more of the following symptoms:

LIST B:

- Chills
- Muscle pain
- Headache
- Sore Throat
- Nausea/Vomiting
- Diarrhea
- Fatigue

- Congestion/Runny Nose

If they have ONE or more symptoms from List A and/or TWO or more symptoms from List B, they are considered to have a COVID-like illness and may not return to class until:

1. Initial COVID-19 testing (PCR) is negative and individual meets our program's normal criteria for return after an illness (fever free, vomiting and diarrhea free for more than 24 hours without medication). **OR**
2. A clinician has evaluated the child and documented an alternative diagnosis and confirmed that the student may return to class **OR**
3. COVID-19 testing was not done and all of the following are true
 - a. At least 10 days since the onset of symptoms AND
 - b. Fever-free off anti-fever medication for 24 hours AND
 - c. Symptoms are improving

Student Entry/Drop-Off Protocol:

The following protocol will be followed when you bring your child to class each day.

- All adults dropping off children must be wearing a face covering and remain 6 feet away from other families.
- Only one guardian may approach the door with your child for drop-off.
- Once you arrive, you will be met outside the door by a staff member wearing a mask who will ask you and your child our screening questionnaire and proceed with a no-contact temperature check. Students with a temperature over 100.4 or who are visibly unwell or report COVID-19 symptoms will not be allowed inside.
- Once you and your child have been screened, you may enter briefly to see them off permitting there is no contact with other students.
- Non-essential visitors will not be permitted inside, including siblings who are not attending.

Student Departure/Pick-Up Protocol:

The following protocol will be followed when you pick up your child from class each day.

- Children ages 10 and older are able to walk home on their own with written permission from a guardian
- All adults picking up children must be wearing a face covering.
- When picking up your child, follow protocol by knocking and waiting for a staff member to bring your child to you with their possessions. Maintain a six foot distance from other guardians.

Playground and Lunch Protocol (for day camps only):

Lunch will be eaten at a nearby park or playground, weather permitting.

- Children will bring their own meals and food sharing will not be permitted.
- In the event a park is overcrowded or raises any safety or health concerns, children will return to the studio or park time will be adjusted.

Health & Safety Measures:

The following measures will be put in place to encourage social distancing as much as is possible with school age children and to prevent the spread of infection.

- All children are required to wear face coverings
- Children and staff will wash hands regularly with soap and water. Hand sanitizer, disinfectant wipes and soap and water will be readily available.
- Children will be separated into smaller groups.
- Staff will routinely clean and disinfect supplies and surfaces. Special attention will be paid to high-touch areas.
- Changes in infection rates in our area will be monitored and we will communicate with staff, families and local authorities as needed.
- Children should bring their own spray sunscreen for self-administration as needed for any outdoor activities.

Staff Protocol:

- All staff will be trained in COVID-19 hygiene and safety protocols.
- All staff have been fully vaccinated.
- Staff will wear face-coverings. Ample clean face-coverings will be provided and face-coverings may not be worn for more than one day without being sanitized.

Complex Medical Care/Compromised Immune Systems:

Children or parents/guardians with complex medical needs or compromised immune systems should consult with their medical provider before making the decision to attend a class or camp.

Plan for When Someone Becomes Sick:

- All staff have been vaccinated. In the event that a staff member experiences a breakthrough diagnosis, they will immediately be sent home and guardians will be notified.
- If unvaccinated children develop symptoms, they will be brought to a designated isolation area with a staff member while waiting to be picked up.

When can a camper with symptoms be allowed back to the studio?

- If an unvaccinated child has COVID-like illness, they can return to class if:
 - Initial COVID-19 testing is negative (PCR) and individual meets our normal criteria for return after an illness (fever free, vomiting and diarrhea free for more than 24 hours without medication) OR
 - A clinician has evaluated the child and documented an alternative diagnosis OR
 - COVID-19 testing was not done and all of the following are true:
 - at least 10 days since the onset of symptoms AND
 - fever-free off anti-fever medications for 3 days AND
 - symptoms are improving. Note: repeat COVID testing is not required to return to the studio.

In the event of COVID-19 exposure:

If an unvaccinated child has been exposed to someone diagnosed with COVID-19, they may not return to class until

- A 14 day quarantine period
- 10 days have passed since last contact with the COVID-19 positive person (they can return on Day 11) WITH a negative PCR test on Day 7 or later AND child is free of symptoms.
- In an instance where two or more siblings (or other members of a household) attend sewing and only one sibling has been exposed, the sibling without the first hand exposure may only continue attending class if they have been quarantined away from the sibling with firsthand exposure since the time of that exposure.

If a fully vaccinated teacher has been exposed to someone suspected or diagnosed with COVID-19, they will be tested 3-5 days after exposure, regardless of whether they have symptoms.

In the event of a confirmed case of COVID-19 in our community:

If a staff member or child tests positive for COVID-19 the following steps will be taken. Staff and families are required to self-report. Our designated point-person for COVID-19 concerns will be Mali Petherbridge. She can be contacted at 215-309-1866 x1 or by email at butcherssewshop@gmail.com.

- Campers will be sent home and that cohort's class for that week will be cancelled.
- Staff, who are vaccinated, will be sent home and tested 3-5 days after exposure.
- We will determine who in our community may have been exposed to the infected person and contact them so that they may take steps such as seeking testing, quarantining and any appropriate restrictions.
- All unvaccinated children in the same camp cohort or who have come in close contact with the case (defined as greater than 15 cumulative minutes of interaction less than 6 feet away over 24 hours or less) should quarantine at home for 14 days or 10 days with a negative PCR test after day 7. Anyone who develops symptoms during that time should contact their healthcare provider to request testing.
 - In accordance with PDPH guidance, a COVID positive individual should remain home until all of the following are true:
 - at least 10 days since the onset of symptoms AND
 - until fever free off anti-fever medications for 3 days AND
 - symptoms are improving.
- Local officials and necessary bodies will be contacted.

Thank you for reading our COVID-19 Safety Protocols. We will continue to update this document as information becomes available to us. We look forward to a safe summer and welcome any questions.

WHEN CAN MY (UNVACCINATED) CHILD RETURN TO SEWING?

COVID-19 Exposure	COVID-19 Symptoms	COVID-19 Positive
<p>Close contact with someone diagnosed with COVID-19</p> <p>(i.e. household members or any other contact greater than 15 minutes at less than 6 feet over the course of 24 hours)</p>	<p>Shows COVID-like symptoms, per PA guidelines:</p> <p>One or more of the following: cough, shortness of breath, difficulty breathing, new loss of sense of smell, new loss of sense of taste</p> <p>AND/OR 2 or more of the following: fever, chills, muscle pain, headache, sore throat, nausea/vomiting, diarrhea, fatigue, congestion/runny nose</p>	<p>Positive COVID-19 diagnosis even without symptoms</p>

<p>14 days have passed since last close contact with COVID-19 positive person</p> <p>OR</p> <p>10 days have passed since exposure and negative PCR test on day 7 or later AND symptom free.</p>	<p>Initial COVID-19 testing is negative and individual meets our normal criteria for return after an illness (fever free, vomiting and diarrhea free for over 24 hours without medication)</p> <p>OR</p> <p>A clinician has evaluated the child and documented an alternative diagnosis and confirmed that the student may return to class</p> <p>OR</p> <p>COVID-19 testing was not done and all of the following are true:</p> <ol style="list-style-type: none"> 1. At least 10 days since the onset of symptoms AND 2. Fever free off anti-fever medications for 24 hours AND 3. Symptoms are improving 	<p>It has been at least 10 days since onset of symptoms</p> <p>AND</p> <p>Student meets our normal criteria for return after an illness (fever free, vomiting and diarrhea free for over 24 hours without medication)</p> <p>AND</p> <p>Symptoms are improving</p> <p>Note: If diagnosed with COVID-19 but asymptomatic, may return to class 10 days after date of positive test</p>
